Delphinium verdunense

Lots of human activities and behaviours must take their share of responsibility for environmental degradation and ecosystem destruction. Here are just some examples of weakened or threatened wild plants.

Rising temperatures change plants' living conditions too quickly for them to adapt.

Excessive sampling of rare plants.

Bellevalia romana

Cistus ladanifer

Epipactis palustris

Limonium humile

Certain leisure activities, like mountain biking, quad biking and rock-climbing, can disturb species and their habitats.

Ophrys aegirtica

Buglossoides gastonii

Ophrys speculum

Dioscorea pyrenaica

Nigella arvensis

Salvia aethiopsis
